Project 2: UI Plan

UI Plan

Interactive elements
1. Navigation
2. "Our Team" and "Yoga in Action" buttons
3. Sticky Header
4. Live yoga class

Interaction with elements
The four interactive elements are meant to enhance the user experience. The navigation menu will be a hamburger menu it is at mobile size. "Our Team" and "Yoga in Action" buttons will have "read more/read less" functionality, displaying more or less information relative to that section. The header will be sticky so that the user can navigate the single scroll site from any position on the page. The live yoga class will display wind factor information for Santa Monica Pier SUP yoga donation classes.

Result of event
When a user clicks on the hamburger menu button, a dropdown of the optional links will appear. When the "Our Team" or "Yoga in Action" buttons are clicked, extra information regarding that section including body copy and pictures will be displayed. There will be an option to "close" or hide the information as well. The Live yoga class section will display weather information from Santa Monica to give the user information on the wind factor that day.

API

Display wind factor information for Santa Monica for "Donation SUP classes @ Santa Monica Pier"
